DESCRIPTION

Tall cylindrical vase with a narrowed neck by Claude Morin, crafted in mouth-blown glass, slightly bubbled and tinted light blue in the mass.

Its slender silhouette, highlighted by a subtly constricted neck, enhances the vertical elegance of the piece. Delicate bubbles trapped within the material enliven the transparency and emphasize the artisanal and poetic character typical of Morin's work. The light blue tone diffuses a soft, airy glow, giving the vase a presence that is both simple and

sophisticated.

The vase is signed on the underside: Morin.
