

Large Rotaflex Pendant Light, France circa 1960

Rotaflex

Sold

REF: 5842

Height: 20 cm (7.9")

Diameter: 40 cm (15.7")

DESCRIPTION

A large Rotaflex pendant light composed of a single flattened, ivory-colored round piece, including its bale cover, dating back to the 1960s.

The material used in crafting this pendant light is Rotaflex, an innovative plastic substance formed from coiled cellulose acetate threads. This material distinguishes itself with its translucency, radiant sheen, and featherlight weight. This pioneering material was developed in the 1950s by the Atelier de Recherche Plastique (A.R.P.), founded by

esteemed designers such as Pierre Guariche, Joseph-André Motte, and Michel Mortier.

The height of this pendant light is adjustable. Bayonet socket.

Manufacturer : Rotaflex, circa 1960.
