

USM Haller Sideboard, Switzerland, circa 1970

1,400

REF: 7752

Height: 85 cm (33.5")

Width: 152 cm (59.8")

Depth: 42 cm (16.5")

DESCRIPTION

Sideboard from the USM Haller modular system, developed by Paul Schärer and Fritz Haller from the 1960s onward and produced in Switzerland.

The piece is composed of two closed modules with drop-down doors, supported by a chromed steel tube structure assembled with USM's iconic spherical connectors. The open lower section, organized with a shelf, visually lightens the composition and reinforces the architectural clarity of the system. The black lacquered panels integrate precisely

within the metal framework, creating a strong contrast and a restrained aesthetic typical of Swiss modernist design.

With an overall width of approximately 60 inches, this sideboard offers a well-balanced format suitable for both domestic and professional environments. It exemplifies USM's philosophy of rational, modular and durable furniture designed to adapt over time.

Manufacturer : USM, Switzerland.
