

Pair of Rotaflex Pendant Lights, France circa 1960

Sold

REF: 6419

Height: 26 cm (10.2")

Diameter: 20 cm (7.9")

DESCRIPTION

Pair of Rotaflex pendant lights, featuring a main yellow ball-shaped piece, adorned with cream cylinders on each side, and completed with its canopy, dating from the 1960s.

The material used in crafting this pendant light is Rotaflex, an innovative plastic substance formed from coiled cellulose acetate threads. This material distinguishes itself with its translucency, radiant sheen, and featherlight weight. This pioneering material was developed in the 1950s by the Atelier de Recherche Plastique (A.R.P.), founded by

esteemed designers such as Pierre Guariche, Joseph-André Motte, and Michel Mortier.

The height of this pendant light is adjustable. Bayonet socket.

Manufacturer : Rotaflex, circa 1960.
